

Acne Treatment

What is elos?

Elos is the safe, non-invasive way to gently and effectively provide relief from acne by treating the problem at its source. Using the power of combined energies, elos offers superior results with the highest levels of comfort and safety.

You gain: Reduction in active acne with faster healing time - Clearer, more beautiful skin - Greater confidence in your appearance.

How does the elos treatment work?

Acne occurs when a sebaceous oil gland surrounding a hair follicle becomes clogged with oil and dead skin cells. Bacteria growth in the clogged area causes infection and the blemishes associated with acne. Elos technology combines bi-polar radio frequency and blue light energies to penetrate the skin, precisely targeting and destroying acne-causing bacteria as well as slowing excessive sebaceous oil production. Elos not only helps reduce active acne, it also speeds up the healing time of existing acne.

Are elos treatments painful?

Acne treatment with elos is very comfortable and requires no topical anesthetics or other skin preparation. The skin surface is cooled, ensuring additional safety during the treatment. Patients will experience no downtime; many will return to normal activities immediately after treatment.

When can I expect to see results from elos?

The number of treatments depends on the severity of the acne. Schedule a **FREE CONSULTATION** to establish your personalised treatment plan.

Are treatments safe? Are there any side effects?

Elos is a safe and effective treatment for most skin types. There are generally no side effects with elos, although some people may experience some short-term reddening just after their treatment.

Hair Removal

Effective, Gentle & Safe Hair Removal

Treat unwanted hair growth on all the body areas including: upper lip, cheeks, chin, ears, neck, chest, back, under arms, arms, stomach, bikini, legs, toes.

Elos is the first and only technology that uses combined energies to effectively and gently remove hair of many colours and types from all skin tones. Elos is truly the next generation of safe and effective hair removal technology. Achieving beautiful, silky smooth skin is now easier than ever.

How does hair removal with elos work?

Hair follicles are precisely targeted and destroyed using the revolutionary elos combination of bi-polar radio frequency and light energies.

Is hair removal with elos right for me?

Both men and women can achieve permanent hair reduction on almost all body areas. Only elos is proven to remove lighter coloured hair, on all skin tones. To achieve a successful outcome on lighter hair colour, more treatments may be needed compared to darker hair colours.

When can I expect to see results?

Hair growth is reduced after each treatment. The number of treatments required will be based on your hair colour and type, body area and skin tone. Schedule a **FREE CONSULTATION** to establish your personalized treatment plan.

Does it hurt?

Cooling of the skin surface as well as constant measurement of the skin's resistance ensures safety and comfort during treatment. This is a no-downtime procedure. Many patients return to normal activities immediately after treatment.

Clinical results

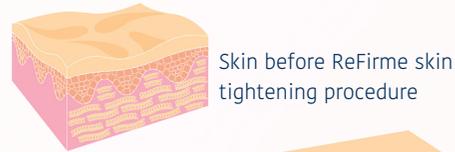

Firmer Skin

Skin Tightening Through Wrinkle Reduction

Achieve firmer skin without downtime

Comfortably achieve a more youthful, firm and toned appearance without downtime. Elos is the first and only technology that uses combined energies to effectively and gently treat your skin.

Skin before ReFirme skin tightening procedure

Skin after ReFirme skin tightening procedure

How does ReFirme work?

The combined bi-polar radio frequency and light energies of elos technology precisely heat the dermal tissue within the target treatment area. This stimulates collagen production and produces a firming effect in lax skin. Wrinkles are reduced, noticeable lifting can be observed and the texture of your skin becomes smoother, more luminous and toned.

When can I expect to see results?

Most patients see gradual and cumulative results throughout the ReFirme treatments. The total number of required treatment sessions depends on your skin's condition. Schedule a **FREE CONSULTATION** to establish your personalized treatment plan.

Is ReFirme skin tightening right for me?

Elos technology is a safe, effective solution for most skin types.

Does it hurt?

ReFirme is a gentle, comfortable treatment requiring no downtime. Many patients return to normal activities immediately after the treatment. Cooling of the skin's surface provides enhanced safety and additional comfort.

Skin Rejuvenation

Pigmented & Vascular Lesion Treatment

Safely restore youthful, healthy looking skin

Safely and comfortably fade the appearance of skin imperfections caused by the sun, and uneven skin tones caused by brown and red spots (such as rosacea, spider veins and age spots).

We're proud to offer elos, the firsts and only technology that uses combined energies to effectively and gently restore and rejuvenate the appearance of your skin.

How does skin rejuvenation with elos work?

The combined bi-polar radio frequency and light energies of elos technology precisely and safely target pigmented lesions such as freckles, sun spots and age spots. Vascular lesions such as spider vessels and redness from rosacea are also lightened and gradually fade.

Is skin rejuvenation with elos right for me?

Elos is an effective treatment for most skin types.

When can I expect to see results?

Gradual and cumulative improvement of skin tone is typically achieved in 5 treatment sessions. The total number of required treatment sessions depends on your skin's condition. Schedule a **FREE CONSULTATION** to establish your personalized treatment plan.

Does it hurt?

Cooling of the skin surface ensures additional safety during treatment. This is a no-downtime procedure. Most patients return to normal activities immediately after treatment.
